

# NeoLifting Buccal Facial

*We are excited to announce our newest treatment!*

NeoLifting technique is like a mindfulness symphony in motion, a specialized holistic approach to facial rejuvenation, using face sculpting and lifting techniques, buccal (intra oral) massage, manual lymphatic drainage techniques, shiatsu and breath work. Buccal massage is the intra oral component of this treatment that allows the muscles deep within the cheeks, jaw and facial structure to be gently released from the inside out.

## Discover the Benefits:

- Releases tension and relaxes the facial muscles
- Emotional release (we hold onto and store a lot of emotional tension in our face & body)
- Relieves TMJ pain
- Improves facial symmetry and alleviates headaches
- A holistic alternative to injectables
- Lifts and sculpts the facial contours, for a more youthful appearance
- Relief of sinus congestion
- Relieves the pressure and stress through the jaw, which is perfect for teeth grinders & clenches
